Are You Ready for a Fire?

Here's what you can do to prepare for such an emergency

- **Make your home fire safe**
  - Smoke detectors save lives. Install a battery-powered smoke detector on each level of your home, as well as in the garage.
  - Use the test button to check each smoke detector at least twice a year. When necessary, replace batteries immediately.
  - Have a working fire extinguisher in the kitchen.

- **Plan your escape routes**
  - Determine at least two ways to escape from every room in your home.
  - Make or purchase rope or chain ladders to use to climb out of rooms above the first floor, and practice using it.
  - Select a location where everyone would meet after escaping your home.
  - Discuss what you would do about family pets if you need to escape from a fire.

- **Conduct periodic fire drills**
  - Remember: crawl low under the smoke to escape. Teach small children how to do this.
  - Close the door as you leave a room and feel closed doors before you enter a room. A hot door probably means the room on the other side is in flames.
  - Practice the stop-drop-and-roll way to put out flaming clothing.
  - Get everyone out quickly. (In a real fire, escape and then call the fire department.)
Each year there are more than 2 million residential fires, resulting in more than 6,000 deaths. Fire is one of the most common disasters. But it doesn't have to be deadly if you have early warning from a smoke detector and everyone in your family knows how to escape calmly.

Please be serious about the responsibility of planning for and practicing what to do in case of a fire. Be prepared by having various household members do each of the items on the checklist below. Then get together to discuss and finalize your personalized Fire Plan.

- Buy and install smoke detectors on each level of your residence . . . as well as in the garage and workshop. Keep new batteries on hand.
  New smoke detectors installed; batteries purchased: ________________________________

- Test smoke detectors every six months. Start a chart and sign it after each round of tests.
  ________________________________ checks smoke detectors.
  (family member name)

- Test the fire extinguisher you have or buy a new one to properly protect your home.

  (family member name)

- Draw a floor plan of your home and mark two fire escape routes for each room.
  Floor plan completed: ________________________________

- Pick an outside place to meet following a fire.
  Meeting place: ________________________________

- Practice a low crawl escape from your bedroom. Try it with your eyes closed to see how well you could do in thick smoke. Also, practice the stop-drop-and-roll technique.
