Are You Ready for a Tornado?
Here's what you can do to prepare for such an emergency

- **Prepare a Home Tornado Plan**
  - Pick a place where family members could gather if a tornado is headed your way. It could be your basement or, if there is no basement, a center hallway, bathroom, or closet on the lowest floor. Keep this place uncluttered.
  - If you are in a high-rise building, you may not have enough time to go to the lowest floor. Pick a place in a hallway in the center of the building.
  - Assemble a Disaster Supplies Kit containing:
    - First aid kit and essential medications
    - Battery-powered radio, flashlight, and extra batteries
    - Canned food and can opener
    - Bottled water
    - Sturdy shoes and work gloves
  - Also include in the kit written instructions on how to turn off your home’s utilities.
  - Conduct periodic tornado drills, so everyone remembers what to do when a tornado is approaching.

- **Stay tuned for storm warnings**
  - Listen to your local radio and TV stations for updated storm information.
  - Know what a tornado WATCH and WARNING means—
    - A tornado WATCH means a tornado is possible in your area.
    - A tornado WARNING means a tornado has been sighted and may be headed for your area. Go to safety immediately.
    - Tornado WATCHES and WARNINGS are issued by county or parish.

- **When a tornado WATCH is issued . . .**
  - If you are inside, go to the safe place you picked to protect yourself from glass and other flying objects. The tornado may be approaching your area.
  - If you are outside, hurry to the basement of a nearby sturdy building or lie flat in a ditch or low-lying area.
  - If you are in a car or mobile home, get out immediately and head for safety (as above).

- **After the tornado passes . . .**
  - Watch out for fallen power lines and stay out of the damaged area.
  - Listen to the radio for information and instructions.
  - Use a flashlight to inspect your home for damage.
Forget The Wizard of Oz notion that “twisters” only happen in Kansas. Tornadoes have been reported in every state. And while they generally occur during spring and summer, they can happen anytime during the year.

With winds swirling at 200 miles an hour or more, a tornado can destroy just about anything in its path. Generally, there are weather signs and warnings that will alert you to take precautions.

Be prepared by having various family members do each of the items on the checklist below. Then get together to discuss and finalize your Family Disaster Plan.

- Pick a safe place in your home where family members could gather during a tornado. (If you have a basement, make it your safe place.) Make sure there are no windows or glass doors in the area. Keep this place uncluttered.

  Basement: □ yes □ no
  If yes, basement is your safe place.
  If no (or if you’re in a high-rise building), choose another safe place.
  Location of safe place: ____________________________________________

- If you live in a mobile home, choose another safe place in a sturdy, nearby building.
  Location of safe place: ____________________________________________

- Put together a Disaster Supplies Kit in a clearly labeled, easy-to-grab box.
  Location of Disaster Supplies Kit: __________________________________

- Write instructions on how and when to turn off your utilities—electricity, gas, and water.
  Instructions written: ____________________________________________ (date)

- Make sure all family members know the name of the county or parish where you live or are traveling, since tornado WATCHES and WARNINGS are issued by county or parish.
  Name of county/parish where you live: ________________________________
  Name of county/parish where you are traveling: ________________________

  Discuss with your family what you will do when a tornado WATCH or WARNING is issued.

And remember . . . when a tornado, earthquake, flood, fire, or other emergency happens in your community, you can count on your local American Red Cross chapter to be there to help you and your family. That’s been our role for more than 100 years.

For further information on tornadoes, ask for Tornado . . . Nature’s Most Violent Storm from your local American Red Cross chapter, National Weather Service office, or emergency management office.
