Division of Water Pollution Control ANNUAL FACILITY INSPECTION REPORT

for NPDES Permit for Storm Water Discharges from Separate Storm Sewer Systems (MS4)

This fillable form may be completed online, a copy saved locally, printed and signed before it is submitted to the Compliance Assurance Section at the above address. Complete each section of this report.

Report Period: From March, 2024 To March, 2025

Permit No. ILR40 0275

MS4 OPERATOR INFORMATION: (As it appears on the current permit)

Name: VILLAGE OF SHILOH Mailing Address 1: 1 PARK DRIVE
Mailing Address 2: County: St. Clair
City: SHILOH State: IL Zip: 62269 Telephone: 618-632-1022
Contact Person: Robert Weilmuenster Email Address: rweilmuenster@shilohil.org
(Person responsible for Annual Report)

Name(s) of governmental entity(ies) in which MS4 is located: (As it appears on the current permit)

ILLINOIS DEPARTMENT OF TRANSPORTATION ST. CLAIR COUNTY & ST. CLAIR TOWNSHIP
O'FALLON TOWNSHIP, CASEYVILLE TOWNSHIP SHILOH VALLEY TOWNSHIP

THE FOLLOWING ITEMS MUST BE ADDRESSED.

A. Changes to best management practices (check appropriate BMP change(s) and attach information regarding change(s) to BMP and measurable goals.)

- | | | | |
|--|--------------------------|---|--------------------------|
| 1. Public Education and Outreach | ☐ | 4. Construction Site Runoff Control | ☐ |
| 2. Public Participation/Involvement | ☐ | 5. Post-Construction Runoff Control | ☐ |
| 3. Illicit Discharge Detection & Elimination | ☐ | 6. Pollution Prevention/Good Housekeeping | ☐ |

B. Attach the status of compliance with permit conditions, an assessment of the appropriateness of your identified best management practices and progress towards achieving the statutory goal of reducing the discharge of pollutants to the MEP, and your identified measurable goals for each of the minimum control measures.

C. Attach results of information collected and analyzed, including monitoring data, if any during the reporting period.

D. Attach a summary of the storm water activities you plan to undertake during the next reporting cycle (including an implementation schedule.)

E. Attach notice that you are relying on another government entity to satisfy some of your permit obligations (if applicable).

F. Attach a list of construction projects that your entity has paid for during the reporting period.

Any person who knowingly makes a false, fictitious, or fraudulent material statement, orally or in writing, to the Illinois EPA commits a Class 4 felony. A second or subsequent offense after conviction is a Class 3 felony. (415 ILCS 5/44(h))

ADMINISTRATIVE REVISIONS TO THE NOTICE OF INTENT

Revisions to the original Notice of Intent (NOI) are reflected below.

MS4 Operator Mailing Address: Yes ☐ No ☒

Persons Responsible: Yes ☐ No ☒

Name: _____

Title: _____

Telephone Number: _____

Area of Responsibility: _____

Introduction

In 2003, St. Clair County (County), Illinois and its communities created a Co-Permittee Group to join forces in complying with the National Pollutant Discharge Elimination System (NPDES) for Municipal Separate Storm Sewer Systems (MS4) Phase II requirements. As stated in the original 2003 Notice of Intent (NOI), the County and the Co-Permittee communities were to pool resources and work together to comply with the commitments made within the NOI for the benefit of all within the County.

The Co-Permittee Group was active during this reporting period. Significant progress was made sharing Best Management Practices (BMPs) for document retention, operation procedures, and maintenance activities.

Best Management Practice (BMP) Summary of 2024-2025 Activities

In 2003, each member of the Co-Permittee Group submitted a NOI in compliance with the first 5-year cycle. In 2008, a NOI was submitted in compliance with the next 5-year cycle, as written in the first MS4 permit. The 2009 NOI was submitted in compliance with additional requirements in the second MS4 permit. In 2013, a new NOI was submitted and the last NOI was submitted in 2021. As stated in each NOI, each Co-Permittee Member identified certain activities to comply with the Phase II requirements. Below is an abbreviated summary of the BMPs that were written in the NOI for each of the minimum control measures.

March 2024-February 2025:

- 1) **A.1-** Stormwater brochures for businesses, homeowners, children, and green infrastructures were to be promoted and displayed by each community in a public place.
- 2) **A.4-** St. Clair County sponsored a booth at the County Fair and/or Earth Day and distributed the storm water and green infrastructure brochures.
- 3) **A.5-** St. Clair County posted newsletters on the County Health Department website during school months. Co-Permittee Members distributed educational materials to schools in their communities. The amount of material distributed was to be tracked by the communities.
- 4) **B.3-** The Co-Permittee Group met four (4) times to review upcoming permit requirements, notice of intent, review stormwater management program, operations training, and to develop and submit the Annual Report.
- 5) **B.5-** Co-Permittee Members solicited and encouraged public assistance in monitoring the community's stormwater system. Public inquiries and complaints were responded to and recorded.
- 6) **B.6-** St. Clair County continued to promote programs related to stormwater activities and recycling programs. The community tracked its participation.

- 7) **B.7-** Co-Permittee Members will provide a public meeting annually for public input.
- 8) **C.1-** Co-Permittee Members updated any new or revised storm sewers and performed stream observations at bridge inspections.
- 9) **C.5-** A survey of previously installed stencils was to be performed as well as replacing or placing any that needed inlet stencils.
- 10) **C.6-** Communication brochures were distributed to the community. Co-Permittee Members discussed any known illicit discharge ordinance compliance issues.
- 11) **C.9-** Co-Permittee Members developed brochures addressing specific stormwater ordinance prohibited activities and distributed with educational brochures.
- 12) **D.1-** Require SWPPP on site plans disturbing more than one acre.
- 13) **D.2-** The Co-Permittee will hold a BMP Training class.
- 14) **D.5-** St. Clair County Continued to Maintain a stormwater hotline number to address public concerns related to stormwater issues. County tracked and reported the number of calls.
- 15) **E.2-** Enforce Stormwater Ordinance and track changes made to the ordinance.
- 16) **E.4-** Require and review SWPPPs on site plans disturbing more than 1-acre of land.
- 17) **F.1-** the Co-Permittee will hold an Operations Training class focused on a review of the history of drainage systems, the Clean Water Act and NPDES permits, and the impacts of stormwater.
- 18) **F.6-** Communities reviewed operating procedures and BMPs and modified, if necessary.

The following pages highlight changes made to the BMPs from the NOI, BMP status, and activities planned for the next reporting year. Additional information is also provided from the County and each Community.

City of: Village of Shiloh

FOIA Officer for the reporting year:

Name: Brenda Kern

Title: Village Clerk

Telephone Number: (618) 632-1022

A. Changes to Best Management- Were there any changes to the BMPs?		B. The status of compliance with the permit, the appropriateness of the BMP and progress towards achieving reduction of discharged pollutants to the MEP, and identified measurable goals for each of the minimum control measures.		C. Provide results of information collected and analyzed, including monitoring data. Information attached?		D. Summarize the stormwater activities you plan to undertake with an implementation schedule.	
Comment	YES	NO	If attached information, describe.	YES	NO	Activity	Schedule
BMP No. A.1 - Distributed Paper Materials- Informational Brochures							
Milestone For Reporting Year: Promote the availability of brochures to the residents.							
	☐	☒	The Village has brochures available to residents at the Village Hall. The County also has brochures available to residents at the front lobby of St. Clair County Highway Department. Educational topics include paint and related decor, lawn and garden care, illicit discharge ordinance compliance, and stormwater ordinances. The St. Clair County Stormwater Hotline number is included.	☐	☒	The County will continue to make educational brochures available to the public.	Ongoing through 2021-2026 permit year.
BMP No. A.4- Community Event- Sponsor Annual Booth at St. Clair County Earth Day Festival							
Milestone For Reporting Year: St. Clair County sponsored a booth at the Earth Day Festival.							
	☐	☒	An Earth Day Event was not held this year but the St. Clair County Health Department sent out information to the schools.	☐	☒	St. Clair County is responsible for the booth and tracking the number of brochures handed out.	Ongoing through 2021-2026 permit year.
BMP No. A.5- Classroom Education Material							
Milestone For Reporting Year: County posts a newsletter on County Health Department website for students during the school months.							
	☐	☒	St. Clair County posted educational newsletters on the Health Department's website.	☐	☒	The communities will inform local schools that the newsletters are available on the Health Department's website.	Ongoing through 2021-2026 permit year.

A. Changes to Best Management- Were there any changes to the BMPs?		B. The status of compliance with the permit, the appropriateness of the BMP and progress towards achieving reduction of discharged pollutants to the MEP, and identified measurable goals for each of the minimum control measures.		C. Provide results of information collected and analyzed, including monitoring data. Information attached?		D. Summarize the stormwater activities you plan to undertake with an implementation schedule.	
Comment	YES	NO	If attached information, describe.	YES	NO	Activity	Schedule
BMP No. B-3- Stakeholder's Meeting- Coordinate Meetings and Annual Reports, Sponsor Various Programs							
Milestone For Reporting Year: Co-Permittee Group met four (4) times to complete training and to develop and submit the Annual Report.							
			Co-Permittee Meetings were held on March 5th, June 4th, September 17th, and December 3rd, 2024. Annual reports were provided to communities in May 2024 and submitted to IEPA before June 1st, 2024. Meeting topics included: Annual Reporting, Data Collections, ILR40 Updates, Sediment & Erosion Control Training, Operations/Good Housekeeping Training, and Post-Construction Management Training. A representative from the Village attended all Quarterly Meetings.			See page 10 and Exhibits B.3-A to B.3-E for more information	The County will continue to meet with the Co-Permittee Group to share BMPs and training opportunities. The Co-Permittee Group has planned four compliance/training activities for the next program year.
	☒			☒			Ongoing through 2021-2026 permit year.
BMP No. B-5- Volunteer Monitoring- Solicit and Encourage Public Assistance in Monitoring the Community's Stormwater System & Stormwater Hotline							
Milestone For Reporting Year: Community will work to involve more public assistance in reporting stormwater issues.							
			The Village updates brochures and websites with County contact information for the reporting of stormwater issues. Any calls or emails are recorded and addressed.			The community will continue to respond to and record all public complaints of illicit discharge and/or dumping and stormwater issues.	Ongoing through 2021-2026 permit year.
	☒			☒			
BMP No. B.6- Program Coordination- Participate in programs targeted at public awareness, including: Inlet Stenciling and Recycling							
Milestone for Reporting Year: St. Clair County continued to promote programs related to stormwater activities. Communities tracked participation.							
			The Village and County will continue to promote programs related to stormwater activities and recycling. Multiple media outlets will be used to communicate with municipalities.			See page 10 and Exhibit B.6-A for more information.	County will continue to promote programs related to stormwater activities. Multiple media outlets will be used to communicate with municipalities.
	☒			☒			Ongoing through 2021-2026 permit year.

A. Changes to Best Management- Were there any changes to the BMPs?		B. The status of compliance with the permit, the appropriateness of the BMP and progress towards achieving reduction of discharged pollutants to the MEP, and identified measurable goals for each of the minimum control measures.		C. Provide results of information collected and analyzed, including monitoring data. Information attached?		D. Summarize the stormwater activities you plan to undertake with an implementation schedule.	
Comment	YES	NO	If attached information, describe.	YES	NO	Activity	Schedule
BMP No. B.7- Other Public Involvement - the community will provide a Public Meeting annually for public input regarding the MS4 Program							
Milestone for Reporting Year: The communities will provide a public meeting annually for the MS4 program.							
	☒	☐	The Village held a public meeting to invite public input regarding the adequacy of the MS4 Program on October 28, 2024. The County held a public meeting to invite public input regarding the MS4 Program on January 13, 2025. No comments were received.	☒	☐	Community will continue to hold a public meeting to solicit public input regarding the adequacy of the MS4 program.	Ongoing through 2021-2026 permit year.
BMP No. C.1- Storm Sewer Map Preparation - The County currently has 100% of outfalls locations & names of receiving waters mapped.							
Milestone for Reporting Year: Co-Permittee member communities reviewed outfall maps and conducted stream observations annually at bridge inspections.							
	☒	☐	Co-Permittee communities reviewed their outfall maps for completeness and updated them if necessary. The Village currently has 100% of outfall locations, the municipal storm sewer system, and names of waters receiving outfall discharge mapped.	☒	☐	Communities will begin/continue to update their storm system maps to include modifications to the system.	Ongoing through 2021-2026 permit year.
BMPs No. C.5- Inlet Stenciling							
Milestone for Reporting Year: Survey condition of inlet stencils.							
	☒	☐	The Village has 100% of inlets marked and will continue assessing, adding, and replacing stencils, as needed. Illicit Discharge Detection & Elimination Training was covered during the June 4, 2024 Quarterly Meeting. The Village attended this meeting.	☒	☐	Communities will survey samples of stencils previously installed, replace ones that need to be replaced, and assure all new inlets are installed with stencils.	Ongoing through 2021-2026 permit year.
BMP No. C.6- Program Evaluation and Assessment							
Milestone for Reporting Year: Perform illicit discharge detection and elimination in the Community's stormwater system.							
	☒	☐	Communities will perform stream observations during annual bridge inspections or stormwater sampling and take appropriate action if any illicit discharge is found. The Village performed illicit discharge stream monitoring at four locations.	☒	☐	Communities will continue to perform stream observations and address illicit discharge per the community ordinance.	Ongoing through 2021-2026 permit year.

COMMUNITY NAME:

IEPA Annual Report for Stormwater Discharges from MS4 Communities- Period: March 2024 through February 2025

A. Changes to Best Management- Were there any changes to the BMPs?		B. The status of compliance with the permit, the appropriateness of the BMP and progress towards achieving reduction of discharged pollutants to the MEP, and identified measurable goals for each of the minimum control measures.		C. Provide results of information collected and analyzed, including monitoring data. Information attached?		D. Summarize the stormwater activities you plan to undertake with an implementation schedule.	
Comment	YES	NO	If attached information, describe.	YES	NO	Activity	Schedule
BMP No. C.9- Public Notification							
Milestone for Reporting Year: Community will update ordinance brochure.							
	☒		The Village has a brochure addressing specific stormwater ordinance prohibited activities available for distribution. Display Location - Village Hall	☒		Ordinance brochures will be updated and distributed as needed.	Ongoing through 2021-2026 permit year.
BMP No. D.1 Regulatory Control Program							
Milestone for Reporting Year: Require SWPPP on all site plans disturbing more than one acre of land inside the Community.							
	☒		The Village requires SWPPP on sites disturbing over 1-acre and enforces ordinance provisions.	☒		The community will continue to require SWPPP on sites disturbing over 1-acre and verify the proper use of sediment and erosion control techniques.	Ongoing through 2021-2026 permit year.
BMPs No. D.2- Erosion and Sediment Control BMPs							
Milestone for Reporting Year: Community will participate in BMP training during Annual Operations Training.							
	☒		BMP Training was covered during the September 17, 2024 Quarterly Meeting. The Village attended this meeting.	☒		Community will continue to participate in BMP Training.	Ongoing through 2021-2026 permit year.
BMP No. D.5- Stormwater Hotline							
Milestone for Reporting Year: County continued to maintain a stormwater hotline number to address public concerns related to stormwater issues.							
	☒		St. Clair County maintained the hotline number during the reporting year. Communities respond to complaints from residents regarding stormwater related issues.	☒		County and Communities will respond to calls and emails related to stormwater issues.	Ongoing through 2021-2026 permit year.

IEPA Annual Report for Stormwater Discharges from MS4 Communities- Period: March 2024 through February 2025

A. Changes to Best Management- Were there any changes to the BMPs?		B. The status of compliance with the permit, the appropriateness of the BMP and progress towards achieving reduction of discharged pollutants to the MEP, and identified measurable goals for each of the minimum control measures.		C. Provide results of information collected and analyzed, including monitoring data. Information attached?		D. Summarize the stormwater activities you plan to undertake with an implementation schedule.	
Comment	YES	NO	If attached information, describe.	YES	NO	Activity	Schedule
BMP No. E.2- Regulatory Control Program							
Milestone for Reporting Year: Enforce County's Stormwater Ordinance							
	☒	☐	Communities will continue to enforce the County's stormwater ordinance and track changes made to the ordinance. There were no changes this year.	☐	☒	Communities will continue to enforce their stormwater ordinance.	Ongoing through 2021-2026 permit year.
BMP No. E.4- Pre-Construction Review of BMP Designs							
Milestone for Reporting Year: Require a Stormwater Prevention Plan (SWPPP) on all site plans disturbing more than one acre of land and review post construction.							
	☒	☐	The Village requires and reviews SWPPPs on site plans disturbing more than 1-acre of land. Post Construction Management Training was covered during the September 17, 2024 Quarterly Meeting. The Village attended this meeting.	☒	☐	Communities will review the post-construction BMPs on all sites that disturb more than 1-acre of land.	Ongoing through 2021-2026 permit year.
BMPs No. F.1- Employee Training							
Milestone for Reporting Year: Community will participate in an Operations Training for employees whose job impacts stormwater runoff.							
	☒	☐	Operations Training was covered during the December 3, 2024 Quarterly Meeting. The Village attended this meeting.	☐	☒	The Co-Permittee Group will continue to review Operations Training at one meeting per program year.	Ongoing through 2021-2026 permit year.
BMP No. F.6- Other Municipal Operations Controls - Standard Operating Procedures							
Milestone for Reporting Year: Communities reviewed operating procedures and BMPs and modified, if necessary.							
	☒	☐	Communities will continue to enforce their stormwater ordinance and track changes made to the ordinance. There were no changes this year. Document Location: Village Hall	☐	☒	Communities will continue to enforce their stormwater ordinance.	Ongoing through 2021-2026 permit year.

COMMUNITY NAME: Village of ShilohPERMIT #: ILR400275

IEPA Annual Report for Stormwater Discharges from MS4 Communities- Period: March 2024 to March 2025

ADDITIONAL INFORMATION

BMP A.5	Classroom Educational Materials St. Clair County posted educational newsletters on the Health Department's website. See attached Exhibit A.5-A for more information.
BMP B.3	Stakeholder's Meeting - Coordinate Meetings and Annual Reports, Sponsor Various Programs The St. Clair County MS4 Co-Permittee Group held four quarterly training meetings during the 2024-2025 permit year. Topics covered included: Annual Reporting, Data Collections, ILR40 Updates, Sediment & Erosion Control Training, Operations/Good Housekeeping Training, and Post-Construction Management Training. Members were issued Certificates of Attendance and Training Completion. See attached Exhibit B.3-A to Exhibit B.3-E for additional details.
BMP B.6	Program Involvement-Participate in programs targeted at public awareness, including Inlet Stenciling and Recycling St. Clair County continued to promote programs and public awareness related to stormwater activities and recycling. See attached Exhibit B.6-A for additional details.
BMP B.7	Other Public Involvement - The community will provide a public meeting annually for public input regarding the MS4 Program St. Clair County held a Public Meeting to invite public input regarding the adequacy of the MS4 Program on January 13, 2025. No comments were received. The County Engineer informed the committee of updates and reports. See attached Exhibit B.7-A for additional details.
BMP C.5	Inlet Stenciling - Illicit Source Removal Procedures St. Clair County Highway Department sponsors Clean Sweep Program throughout the County. By sponsoring this program, St. Clair County is eliminating a significant source of stormwater pollution by keeping debris out of streams and road ditches. See attached Clean Sweep Spreadsheet with totals collected included: Exhibit B.6-A.
BMP D.2	Erosion and Sediment Control BMPs St. Clair County will provide annual BMP training at (1) Quarterly Meeting. See attached Exhibit D.2-A for more details.
BMP E.4	Pre-Construction Review of BMP Designs St. Clair County requires and reviews SWPPPs on site plans disturbing more than 1-acre of land. Post Construction Management Training was covered during the September 17, 2024 Quarterly Meeting. See Exhibit E.4-A for more details.

Additional Community Activities

(Make additional copies of form, if necessary)

List any additional community-sponsored activities performed between March 1, 2024 and February 28, 2025 not listed in the *Notice of Intent* (NOI) submittal, but which address one of the six minimum control measures:

The Village has a municipality website and posts Annual Reports, NOI, and the Storm Water Hotline number.

The Village participates in recycling paper, batteries, electronics and large item pickup. Three elementary and middle schools in Shiloh sponsored weekly paper recycling drives. See Exhibit: B.6-A for photo.

The Village provided a Christmas Tree Recycling Program the week after New Years through Republic Services. Trees were picked up at residences on the same day as scheduled trash service.

The Village works with the Boy Scouts to provide an recycling event at least once a year. The event was held April, 2024. See Exhibit: B.6-A for photo.

The Village participated in the "County Used Tire Collection 2024". See Exhibit: B.6-A for photo.

One 30-cubic-yard roll off dumpster was used by the Village for trash picked up out of road ditches and waterways. The dumpster is located at PW Maintenance Yard and was emptied monthly.

The Village has cleaned various catch basins at multiple locations throughout the Village, as needed.

The Village spent 80+ hours grading ditches throughout the Village collecting trash and debris in a dumpster. Dirt and silt were re-purposed.

The Village maintained streets by routinely sweeping, collecting 56 truckloads of trash and debris this program year. Dirt, silt and leaves were composted. See Exhibit: Additional Community Activities-A for photo.

The Village used approximately 58 tons of salt to treat every street in Shiloh, including IDOT and County roads that are inside the Village limits. See Exhibit: Additional Community Activities-A for detail.

St. Clair County Public Works - Work Orders - See Exhibit: Additional Community Activities-A for report.

St. Clair County Groups & Organizations - See Exhibit: Additional Community Activities-B for details.

The Village is involved with the following associations: East-West Gateway Council of Governments and Scott Air Force Base Community Partnership - Storm water and St. Clair County is involved with a number of Groups and Organizations.

The Village conducted Quarterly Visual Assessments at the following (3) locations: (1) 3 Springs Lake near Frank Scott Pkwy (2) Richland Creek near Harmann Lane (3) Creek near London Lane See Exhibit: Additional Activities-C for reports

First Quarter Sample Date: 3/15/24

Third Quarter Sample Date: 7/30/24 & 9/24/24

Second Quarter Sample Date: 4/03/24 & 5/09/24

Fourth Quarter Sample Date: 11/06/24

Circle which minimum control measure is addressed:

☒ 1. Public Education & Outreach

☒ 2. Public Participation/Involvement

☒ 3. Illicit Discharge Detection & Elimination

☐ 4. Construction Site Runoff

☐ 5. Post-Construction Runoff Control

☒ 6. Pollution Prevention/Good Housekeeping

C. Reliance on Government Entities for Permit Obligations

The Village is part of the St. Clair County Co-Permittee Group

CI. List of Construction Projects during the Current Reporting Year

<u>Permit #</u>	<u>Project</u>

ILR10AZ40	Encompass Health (+/- 8.9 Acres) - Ongoing
ILR10ZA6Q	Greystone Estates – Phase 2 (+/- 9.5 Acres) - Ongoing

EXHIBIT A.5-A

Education Materials for Schools

WHEN IT RAINS, IT DRAINS IT ALL HAS TO GO SOMEWHERE

Water from inside our homes goes to a wastewater facility for purification. But water from roofs, streets, and outdoor spigots goes untreated directly into storm drains - straight to our waterways - picking up all kinds of contaminants along the way!

DID YOU KNOW

Excess nutrients, specifically nitrogen and phosphorus, pollute stormwater run-off from urban areas, contributing to **the third greatest cause of lake deterioration** in the US.

DID YOU KNOW

The amount of phosphorus in the grass clippings from mowing your lawn just once can produce up to **100 pounds** of unwanted algae if it ends up in our lakes and streams.

DID YOU KNOW

Just one pound of fertilizer can produce up to **34.2 pounds** of excess algae growth in streams and lakes.

DID YOU KNOW

Just one pound of fertilizer over application on the average lawn can equate to **34.2 pounds** of excess algae growth in streams and lakes.

DID YOU KNOW

When you wash your car in the driveway, you're washing about **120 gallons** of grime-filled water downstream. The soap, together with the dirt, grease, and grime flows untreated into nearby storm drains that run into lakes and streams.

DID YOU KNOW

Household waste that ends up in the trash includes **300 million pounds** of household waste that ends up in the trash every year. This includes things like paint, oil, and other hazardous materials that can pollute our waterways.

WHY IT MATTERS

Too many nutrients in streams and lakes cause rapid growth of algae.

Algae looks bad, smells bad, degrades water quality and can be harmful to your health.

As algae decays, it uses up oxygen in the water, leading to a decline in our drinking water quality - making it more expensive to treat.

WHAT YOU CAN DO

Dispose Properly

- Compost or bag your leaves and lawn clippings
- Don't blow leaves or lawn clippings into the street
- Sweep up any spills or overspray of fertilizers on sidewalks or streets

Fertilize Efficiently

- Always follow the manufacturer's application recommendations. More isn't better!
- Fertilizing in early fall promotes healthy root systems - leading to stronger, more resilient lawns and plants

Be Car Smart

- Use a commercial car wash where water is recycled and sent to treatment facilities
- Wash your car on the lawn or gravel
- Dump your soapy bucket in the sink

Pick It Up & Pitch It

- Clean up dog waste and dispose of it properly
- Pet waste bags are available in most city parks

For Businesses

- Do your part at work to prevent stormwater pollution
- Perform necessary maintenance to ensure stormwater ponds and drainage control structures stay clear of litter and excessive sediment buildup
- Properly dispose of chemicals and grease

For Contractors

- Special stormwater permits are required for most construction sites
- See CityofMontrose.org/Stormwater for additional details
- Report excessive dust or mud trackout from construction sites

Illegal Dumping

- Do not dump chemicals or other waste materials into storm drains — It's illegal
- If you see it, report it

Reporting

ST. CLAIR **COUNTY'S** **STORMWATER** **GUIDE FOR KIDS**

TAKE A DIP!

**STORMWATER POLLUTANTS
FIND THEIR WAY INTO WHERE
WE FISH, WHAT WE DRINK AND
WHERE WE SWIM.**

Everything that goes into our storm drains—grass clippings, soap, pesticides, pet waste, whatever—makes its way straight to our streams. Stormwater pollution is our biggest source of water pollution. It all adds up. It all comes back. **And you're the solution, now that you know where it goes.**

What's wrong with this picture?

The people are taking care of their home and car, but they are doing many things that can damage the environment, especially our water.

Answers:

1. Car is leaking oil & antifreeze into the street
2. Sprinkler is watering the sidewalk.
3. Man is littering.
4. Raking leaves into plastic bags—use compost
5. Pouring oil down sewer

Go to <http://www.epa.gov/OWOW/NPS/kids/whatwrng.htm>

Click on the spots where you think someone is doing something wrong for an explanation and how we can do to protect our environment.

Stormwater Tips

- ⇒ Sweep driveways instead of hosing
- ⇒ Place trash in closed containers and pick up litter from others
- ⇒ Don't pour anything into the street or storm drain. It ends up in your rivers and streams
- ⇒ Pick up after your pet when you walk them

"Please don't soil our waters!"

It's no fish story: soil erosion is our #1 water pollutant.

While working with soil it keeps waterways from filling with sediment, which can harm fish and other wildlife. It also can block the water and lead to quality problems.

Quarterly Meeting Agenda
March 5, 2024**

Introductions

- ☐ Gonzalez Companies, LLC
 - Tony Schenk (tschenk@gocos.net) / (618) 222-2221 ext. 101
 - Jon Schaller (jschaller@gocos.net) / (618) 222-2221 ext. 119
 - Tammy Mezo (tmezo@gocos.net) / (618) 222-2221 ext. 118
- ☐ IEPA Representative
 - Joe Stitely (joe.stitely@illinois.gov)
 - Dora Diekemper (dora.diekemper2@illinois.gov)
- ☐ Co-Permittee Group Representatives – First Meeting?

Open Discussion

- ☐ Updated Contact Information for Members
- ☐ Submission of NOI's for Change in Operator
- ☐ Collaboration Purchase of Drain Markers
- ☐ Other?

Past Events

- ☐ December 5th Quarterly Meeting
 - Good Housekeeping / Operation and Maintenance
 - ☐ Presentation and Resources
 - ☐ Employee Training and Other Resources
 - Municipal Stormwater Management and Funding Opportunities

Permit Requirements Reminders Regarding Data Collections

- ☐ Public Education and Outreach - Brochures and Events
- ☐ Public Involvement and Participation – Annual Public Meeting
- ☐ Illicit Discharge Detection and Elimination (IDDE) – Quarterly Sampling (June)
- ☐ Construction Site Runoff Control – Annual Training - (September)
- ☐ Post-Construction Management – Annual Training - (September)
- ☐ Good Housekeeping / Operation and Maintenance – Annual Training – (December)

Presentation and Resources

- ☐ Data Collection / Annual Reports
- ☐ Public Education and Outreach
- ☐ Public Involvement and Participation

Upcoming – Next Meeting Tuesday June 5th – 9:00 a.m.

- ☐ Submittal of Annual Reports – Due May 31st
- ☐ Illicit Discharge Detection and Elimination

St. Clair County MS4 Co-Permittee Group
Quarterly Meeting Agenda
June 4, 2024

Introductions

- ☐ Gonzalez Companies, LLC
 - Tony Schenk (tschenk@gocos.net) / (618) 222-2221 ext. 101
 - Tammy Mezo (tmezo@gocos.net) / (618) 222-2221 ext. 118
 - Brad Burnworth (bburnworth@gocos.net) / (618) 409-7482
 - Sarah Dorlac (sdorlac@gocos.net) / (314) 809-3343
- ☐ IEPA Representative
 - Dora Diekemper (dora.diekemper2@illinois.gov)
- ☐ Co-Permittee Group Representatives – First Meeting?

Open Discussion

- ☐ Updated Contact Information for Members
- ☐ Submission of NOI's for Change in Operator
- ☐ Upcoming MS4 Audits
- ☐ Data Collections / Annual Reports
- ☐ Other?

Past Events

- ☐ March 5th Quarterly Meeting
 - Public Involvement / Public Education and Outreach
 - ☐ Public Meeting Presentation
 - ☐ Public Education Brochures
 - Data Collections and Annual Reports

Permit Requirements Reminders Regarding Data Collections

- ☐ Public Education and Outreach - Brochures and Events
- ☐ Public Involvement and Participation – Annual Public Meeting
- ☐ Illicit Discharge Detection and Elimination (IDDE) – Quarterly Sampling (June)
- ☐ Construction Site Runoff Control – Annual Training - (September)
- ☐ Post-Construction Management – Annual Training - (September)
- ☐ Good Housekeeping / Operation and Maintenance – Annual Training – (December)

Presentation and Resources

- ☐ Illicit Discharge Detection and Elimination – Brad Burnworth
- ☐ Stormwater Monitoring Plan / Stormwater Sampling – Tony Schenk

Upcoming – Next Meeting Tuesday September 17th – 9:00 a.m.

- ☐ Construction Site Runoff Control / Post-Construction Management

**St. Clair County MS4 Co-Permittee Group

ST. CLAIR COUNTY'S STORMWATER GUIDE FOR BUSINESSES

Rain washes oil, fertilizer
and other pollutants
into storm drains...

which flows untreated
into lakes and streams.

You can help prevent water pollution
by volunteering to apply drain markers
to storm drains in your neighborhood.

Also, consider adopting a stream to
keep trash out of our creeks.

stop someone from ripping you off

You many not hear it.
You may not see it...
But you definitely pay for it.

Dumping waste into storm drains, ditches or waterways is illegal. Dumping contaminates drinking water supplies, recreation areas and wildlife habitat. Cleanup efforts cost millions of dollars each year. And that's your tax dollars hard at work.

Avoid getting ripped off. Report illegal dumping right away. Your action will help prevent further water contamination and reduce potential clean up costs.

Spill Prevention And Clean-Up Plan

- Take the time to use precautions to prevent spills.
- Keep materials inside water-tight and rodent-proof containers.
- Sweep and mop frequently to reduce the amount of dirt and other residues that accumulate where you work.
- Clean up spills promptly if they do happen.
- Clean up without water whenever possible by sweeping.

“Please don’t soil our waters!”

It's no fish story: soil erosion
is our #1 water pollutant.

Storm Water Tips

- ⇒ Don't dispose of oil and other chemicals onto driveways, parking lots or storm drains. Use a recycling center.
- ⇒ Wash vehicles at commercial car washes that recycle their wastewater.
- ⇒ Store and dispose of all chemicals according to the manufacturer's recommendations.
- ⇒ Sweep parking lots and storage areas once a month. Dispose of the dirt and debris in the appropriate trash can.
- ⇒ Place trash in its proper closed container and pick up litter from others.
- ⇒ Cover materials stored outdoors to prevent excess runoff to storm water drains.
- ⇒ Use water for cleaning exterior area sparingly.

ST. CLAIR COUNTY'S RESIDENT STORMWATER GUIDE

Seven Simple Steps to Clean Water

- 1 Help keep pollution out of storm drains
- 2 Recycle sparingly and responsibly
- 3 Carefully store and dispose of household cleaners, chemicals, and oil
- 4 Clean up after your pet
- 5 Practice good car care
- 6 Choose earth-friendly landscaping
- 7 Save water

Our Water. Our Future. Ours to Protect.

Carefully store and dispose of household cleaners, chemicals, and oil.

Did you know that many household products are dangerous to our kids, pets, and the environment?

These materials pollute our waterways if washed or dumped into storm drains or roadside ditches that lead directly to our lakes and rivers. Household cleaners, pesticides, gasoline, antifreeze, used motor oil, and other hazardous products need to be labeled, stored, and disposed of properly.

So what can you do? Simple.

- Be aware of household products that can harm children, pets and the environment. Pay attention to words such as "warning" or "caution" on product labels.
- Reduce waste and save money by purchasing only the materials you need.
- Keep unused products in their original containers with labels.
- Never dump hazardous products down storm drains, roadside ditches, sinks, or on the ground—take them to your local community's hazardous waste collection day

Help keep our homes and the environment safe.

www.inyourwater.org

HERE TOMORROW

Many things you put on your yard end up in the water near you.

Send them packing! There are lots of less toxic ways to control pests in your home and garden without using harmful chemicals.

You can have a lush garden and pest-free home while keeping your family and our waterways healthy.

Just insects? Use anti-bait instead of poisonous spray.

Stormwater Tips

- Don't dispose of oil and other chemicals onto driveways, streets or storm drains. Use a recycling center.
- Wash your car at commercial car washes that recycle their wastewater.
- Dispose of all chemicals according to the containers.
- Sweep driveways instead of hosing.
- Do not overwater lawns and gardens.
- Reduce the amount of fertilizers and pesticides you apply on your lawn and landscaping.
- Place trash in closed containers and pick up litter from others.
- Have your car tuned up and make sure it's not leaking fluids.
- Pick up after your pets when you walk them.

STOP STORMWATER POLLUTION.

HELP YOUR WATERSHED!

STORMWATER MANAGEMENT

STORMWATER MANAGEMENT

Everyone lives in a watershed, and it takes a community to maintain and protect it!

St. Clair County is looking for input on water quality concerns or issues in your watershed. If you have any information, please provide it online at:

co.st-clair.il.us/stormwater/concerns

However, no matter where you live in a watershed, you contribute to the health of local streams and rivers. If you don't have information to contribute, you can still help improve the health of your watershed by following the guidance in this brochure!

BEST MANAGEMENT PRACTICES

618-825-2531

stormwater@co.st-clair.il.us

A riparian landowner

owns property adjacent to

a lake or stream. The

shoreline of a lake or

stream and the immediate

adjacent area is called a **riparian buffer**. Riparian

landowners are the last defense to protect our lakes and streams.

Healthy riparian buffers serve many purposes such as protecting water quality, reducing erosion, enhancing wildlife habitat, minimizing impacts of human activities, and providing positive aesthetics.

Riparian landowners enjoy benefits from the lake or stream's natural attributes and are responsible for maintaining the streambanks or lakeshore (and riparian buffer) on your property.

This brochure provides some helpful tips for maintaining a healthy riparian buffer. Riparian buffers should be at least 10 feet of dense native plants to grow along the water's edge and streambank to allow pollutants to filter out and the banks to stabilize.

LIVING ON THE WATER'S EDGE

Living on the water's edge refers to landowners that live at properties along the shoreline of a lake or stream and the immediate adjacent area; this is also referred to as **RIPARIAN BUFFER**.

STORMWATER MANAGEMENT COMMISSION

Best Management Practices for Properties Adjacent to Streams and Lakes

DON'T DUMP!

Dumping yard waste and other debris in your riparian buffers and streams can cause stream blockages, elevate flood stages, and wash sediment and debris (excessive nutrients) into the water bodies.

- ◆ Never dispose of chemicals in the streams, lakes or riparian buffers.
- ◆ Never dispose of branches, leaves, or clippings in the riparian buffers.
- ◆ Remove fallen trees that block flows

FERTILIZE WISELY

One of the largest problems in Lake County streams and lakes is high amount of nutrients, which produce excessive growth of algae and other undesirable aquatic plants.

- ◆ Test your soil before fertilizing.
- ◆ Don't apply fertilizer before a rain event
- ◆ Be P-free with your fertilizers!
- ◆ Don't apply fertilizers to riparian buffers.

MINIMIZE STORMWATER RUNOFF

Impervious surfaces (roofs and driveways) convey runoff and pollution to our waterways. By minimizing impervious surfaces you can reduce the transport of sediment, chemicals, and other pollutants to waters.

- ◆ Disconnect flow from downspouts & sump pumps from the stream or lake and direct to a rain garden or bioswale

RIPARIAN BUFFER

RIGHT PLANT—RIGHT PLACE!

Deep rooted native plants and trees have long root systems to keep soils in place, absorb runoff, and filter out pollutants. When ground and banks are left bare, soil erodes and washes off into nearby lakes and streams.

- ◆ Remove invasive plants from your yard & riparian buffers
- ◆ Use deep rooted native plants in your landscaping—less water required

Rain Gardens are shallow depressions planted with native plants and are positioned to capture stormwater runoff.

OVERVIEW

Washing your car at home or at a local fundraiser can wreak havoc on nearby bodies of water, simply by sending pollutants like dirt, soap, oil, grease and metals, along with the wash water, into streams and river. Ideally, waste water from car washes should be emptied into a sanitary sewer (the system that transports wastewater to a treatment facility) if allowed by local jurisdiction.

The following suggestions are some other ways to make your car washes friendly to our local waterways.

REMEMBER: Only rain goes down the storm drain!

AT HOME:

- Pull your car onto the lawn before washing. You can water your lawn at the same time you wash your car.
- Use phosphate-free, biodegradable cleaning products.
- Avoid using degreasers, solvents and tire cleaning products.
- Wring out sponges and rags in a bucket, then empty the bucket into the sanitary sewer system, via sinks or toilets. You can also empty the bucket onto pervious landscaped areas where wastewater can be absorbed.
- Use a low-flow nozzle for your hose and turn it off when you're not using the water.
- Sweep up any debris (rather than hosing it to the street) and dispose of it in the garbage.
- If possible, take your car to a commercial car wash. These facilities use technology to achieve minimal water usage and discharge their water in a regulated and safe manner. Some car washes reuse water and even employ environmentally friendly soaps!
- **Bonus Tip:** Ensure you're regularly changing your oil to prevent excessive oil leakage.

AT A FUNDRAISER:

- Follow guidelines in the "At Home" section.
- Use a car wash kit to prevent soapy, dirty water from entering the storm sewer.
- Hold the event at commercial car wash. The increased traffic can benefit both the fundraiser and the commercial car wash!
- Sell tickets to a commercial car wash, where soapy water is disposed in a safe manner.
- Use earth-friendly cleaning products.
- Make use of a pressure washer. This will get the job done, but use less water.
- Follow the *Just Enough* principle. Use just enough soap and water needed to get the job done. Even if the soap is biodegradable, it can still have an effect on fish and invertebrates in our rivers. Less soap also means more of a profit for the charity!

ST. CLAIR COUNTY

co.st-clair.il.us/stormwater

What NOT to put in your Sharps Container:

- NOTHING other than sharps.
- No bandages, gauze, alcohol wipes, or other trash.
- No medications: over-the-counter or prescription.

Where to dispose of medications:

- CVS at 4609 W. Main St., Belleville
- CVS at 753 W. Hwy. 50, O'Fallon
- Walgreens at 5890 N. Belt West, Belleville
- Walgreens at 2510 State St., East St. Louis
- Copper Bend Pharmacy, Ste. 920B, Belleville
- Caseyville, Fairmont City, Fairview Heights, & O'Fallon Police Departments.
- St. Clair County Sheriff's Dept., entrance at 700 N. 5th St., Belleville

Our current grant ends on June 30, 2024. Full containers can be dropped off until that date.

RE: LOCAL GOVERNMENT ONLY Used Tire Collection 2024

The Illinois Environmental Protection Agency is pleased to sponsor a used tire collection for St. Clair County. This tire collection is for **Governmental Entities ONLY** and is **NOT open to the general public**. No used tires from ULG fleets or from private entities are allowed. Please DO NOT advertise this collection to the public.

The collection will be held on Tuesday September 17, 2024 and Wednesday, September 18, 2024 from 8:00a.m. until 3:00p.m. on both days.

Illinois Department of Transportation has graciously allowed the use of their property at 8313 Shiloh Valley Township Line Road, Lebanon, Illinois.

Tires on rims, large truck, and tractor tires MUST be kept separate to facilitate unloading in a different area at the collection site.

Please take the necessary steps to ensure that mud and comingled waste materials (i.e. rocks/bricks, lumber, and garbage are removed from each load PRIOR to delivery.

Committee at Large Meeting Minutes
October 28, 2024

Call to Order

The Shiloh Village Board of Trustees met at the Shiloh Municipal Building and was called to order at 7:00 p.m. Brenda Kern, Village Clerk, called roll showing the following Trustees present: Holzum, McCullough, Northway, Vernier, Warchol, Wilke.

Pledge of Allegiance

Mayor Weilmuenster led the Pledge of Allegiance.

Public Comments \ Announcements

Minutes – SEPTEMBER 23, 2024

MOTION made by Trustee McCullough; **SECOND** by Trustee Northway to approve the Minutes as presented. **MOTION** carried by voice vote.

Treasurer's Report

1. The report will be approved at the Regular Meeting.

Mayor's Report

1. **REQUEST FROM KESWICK SUBDIVISION HOA TO OBTAIN A PORTION OF THE PARCEL OF LAND LOCATED AT 4191 LEBANON AVENUE (PARCEL 09-08.0-106-002)**

The Mayor stated that he would gather additional information for a future meeting to ensure the Board has all the necessary facts before deciding.

Board of Trustees Committee Reports:

Planning & Development

1. **SPECIAL USE PERMIT REQUEST MUNICIPAL CODE—SCHEDULE 151.046. THE APPLICANT SEEKS TO OPERATE A CONVENIENCE STORE THAT INCLUDES LIQUOR SALES, ON-SITE POURING, AND VIDEO GAMING OPTIONS. CURRENT ZONING: B3. SUBJECT PROPERTY ADDRESS: 2417 LEBANON AVENUE. APPLICANT: JASMINBHAI SANGANI, 210 EDBROOKE DRIVE, SHILOH, IL 62221 OWNER: BRADDOCK DEVELOPMENT, INC., 6056 BRADDOCK LANE, COLUMBIA, IL 62236**

The current owner has agreed to address the parking lot repairs. The applicant indicated his intent to purchase the building, initially planning to lease it for one year with an option to buy afterward. His immediate focus will be on renovating the building's interior. The convenience store will offer typical items such as chips, candy, & frozen foods. Plus, he will have liquor sales and video gaming. He plans to honor the existing leases of the two other businesses in the building but ultimately hopes to expand into those areas.

MOTION made by Trustee Holzum; **SECOND** by Trustee Northway to forward this request to the Regular Meeting for approval. **MOTION** carried by voice vote.

2. **AMENDMENT\RE-ZONING REQUEST – MUNICIPAL CODE – SECTIONS 151.347 & 151.046. THE APPLICANT INTENDS TO OPERATE A TIRE SERVICE STORE IN THE FORMER CIRCLE K BUILDING. CURRENT ZONING: B3. PROPOSED ZONING: B4. SUBJECT PROPERTY ADDRESS: 2411 LEBANON AVENUE. OWNER & APPLICANT: EYAD M. SALAMAH, 3725 WINWARD WAY, SWANSEA, IL 62226**

The tire shop will be a privately operated business. The applicant stated that he has purchased the property and is working with an architect on the exterior of the building. His partner already operates a tire shop on North Belt West, bringing experience and familiarity to the business. Tire storage will be in the rear part of the building, as shown in the pictures provided. The applicant emphasized that there would be no outdoor storage and confirmed they have arranged for weekly or bi-weekly tire pickups. They have also begun improving the property, including roof repairs to address leaks.

Village Attorney Ysursa highlighted that the Planning Commission's primary concern was opening the area to B-4 zoning potential other uses. He agreed to explore the most effective way to address the request while resolving the associated concerns before the Regular Meeting.

MOTION made by Trustee Holzum; **SECOND** by Trustee Warchol to forward this request to the Regular Meeting for approval. **MOTION** carried by voice vote.

3. **SOLAR FARM ORDINANCE**

Board Members discussed and agreed that solar farms can all be a Special Use in B2, B3, B4, PB, NU, and light industrial.

MOTION made by Trustee Holzum; **SECOND** by Trustee Northway to forward this draft Ordinance to the Regular Meeting for approval in the zoning classes listed above. **MOTION** carried by voice vote.

4. **CELL TOWER MODIFICATION REQUEST – 2229 LEBANON AVENUE (SAFE LOCK STORAGE) – TMOBILE – UPDATING CURRENT EQUIPMENT TO ENHANCE BROADBAND CONNECTIVITY & CAPACITY**

MOTION made by Trustee Holzum; **SECOND** by Trustee Warchol to forward this request to the Regular Meeting for approval. **MOTION** carried by voice vote.

Public Parks & Facilities

1. Nothing reported.

Public Safety

1. Nothing reported.

Streets

1. **TWM – STREET ANALYSIS PROGRAM UPDATE**

A Pavement Management Program was initiated in 2016, where all streets were rated using a PCI (Pavement Condition Index) system. Streets are categorized into five tiers: Very Good (86+), Good, Fair, Poor, and Very Poor (<40).

Most streets in the village are concrete (61%), though this percentage has decreased as some roads have transitioned to asphalt through patching and overlays. The remaining streets include asphalt, oil-and-chip, and some gravel.

Streets deteriorate over time based on material type, with concrete having a more linear deterioration curve and asphalt declining more rapidly if not maintained. Regular maintenance, such as patching and overlays, is more cost-effective than waiting for total reconstruction needs. The village assesses street conditions every 2-3 years and uses deterioration curves to estimate condition changes in off-years.

The village maintains an average PCI score of 80, with 79.77% of streets rated in satisfactory or better condition. This rating is among the best in the area. Recent projects have improved overall conditions, such as concrete patching in the Ravenwood Subdivision and asphalt overlays in the High Valley Subdivision.

Due to consistent maintenance and strategic investments, Shiloh's streets are in excellent condition. Upcoming projects focus on improving aging infrastructure while leveraging grant opportunities to address high-priority areas.

Recent and Upcoming Projects:

Second Street Reconstruction: Total reconstruction with new curbs, gutters, storm sewers, and asphalt pavement. Winter work will focus on storm sewer installation, with surface work resuming in the spring.

Future Projects: Country View & Prairie View: Asphalt overlays on oil-and-chip streets, improving longevity and ride quality. Cul-de-Sacs: Full concrete replacements for deteriorated cul-de-sacs, patching, and overlaying concrete streets like Piper Hills Drive. Various Areas: Spot repairs and overlays in locations like Anderson Lane, Radcliffe, and Calgary streets. Meadows Subdivision: Continue asphalt overlays to address large cracks and improve surface quality.

Grant-Funded Projects: Anderson Lane: Using an STP grant for total reconstruction of this collector street near the golf course. Maple Street: An STP/CMAQ-funded project to widen the road, add turn lanes, and improve conditions from the intersection to the Shiloh Heights Subdivision.

2. FYI: MS4 PROGRAM: MUNICIPAL SEPARATE STORM SEWER SYSTEM – ST. CLAIR COUNTY AND SURROUNDING COMMUNITIES

This was included in the packet for informational purposes.

Other Business

The Asst. Chairperson called to order with the Pledge of Allegiance at 4:00 p.m.

Mr. Mosley made a motion seconded by Mr. Hollinsworth for the approval of minutes from the 12-2-2024 meeting.

The Asst. Chairperson asked if there were any comments on the agenda. None were present.

The Asst. Chairperson asked if there were any comments from the audience. None were present.

Discussion Item 1) MS4 program and status discussion. Information and status was given by the County Engineer.

Ordinance

Mosley

A) Ordinance altering the Maximum Speed Limit throughout the Country Crossing Subdivision to 25 miles per hour. Mr.

made a motion seconded by Mr. O'Donnell to approve. All members voted aye.

Resolutions:

- A) Resolution authorizing the furnishing of aggregate materials per the unit price material quotations received 1-7-2025; Section 25-00000-00-GM. Mr. O'Donnell made a motion seconded by Mr. Allen to approve. All members present voted aye.
- B) Resolution authorizing the award to repair the bridge which carries Bowler Road over Ogles Creek in O'Fallon Road District to the low bidder, Lake Contracting Incorporated in the amount of \$99,977.00; Section 24-15104-02-BR. Mr. Mosley made a motion seconded by Mr. Allen to approve. All members voted aye.
- C) Resolution authorizing the award to furnish and apply bituminous road oil materials to the low bidder, Piasa Road Oil, LLC in the amount of \$1,44,845.0; Section 25-(1-9)000-00-GM. Mr. O'Donnell made a motion seconded by Mr. Mosley to approve. All members present voted aye.
- D) Resolution authorizing the furnishing of bituminous materials per the unit price material quotations received 1-7-2025; Section 25-00000-00-GM. Mr. O'Donnell made a motion seconded by Mr. Mosley to approve. All members present voted aye.
- E) Resolution authorizing a contract with Hanks Excavating in the amount of \$19,425.00 to replace a deteriorated culvert on State Street. Mr. Mosley made a motion seconded by Mr. Allen to approve. All members present voted aye.
- F) Resolution authorizing an agreement with the City of Fairview Heights related to the STP grant application to improve Ashland Avenue in the City of Fairview Heights. Mr. Mosley made a motion seconded by Mr. O'Donnell to approve. All members present voted aye.
- G) Resolution authorizing an agreement with the Village of Shiloh related to improvements on Maple Street in Shiloh. Mr. Mosley made a motion seconded by Mr. Allen to approve. All members present voted aye.
- H) Resolution authorizing the purchase of metal culverts at the low bidder unit price; Section 25-00000-00-GM. Mr. Trentman made a motion seconded by Mr. Mosley to approve. All members present voted aye.
- I) Resolution authoring the purchase of a 2024 Ford F250 Crew Cab 4X4 in the amount of \$55,500.00. Section 25-0000-00-EQ. Mr. Mosley made a motion seconded by Mr. Allen to approve. All members present voted aye.

- J) Resolution authorizing a contract with Gonzalez Companies LLC for professional services relative to the MS4 Program in the base amount \$1800.00 plus costs per sampling. Mr. Mosley made a motion seconded by Mr. Hollinsworth to approve. All members present voted aye.

Engineer's Report

Pre-Con for the Frank Scott Parkway Extension 1-9-2025.

Resolution reached for number of lanes on Greenmount Bridge south of FSP.

Public involvement Meeting on the northerly portion of Greenmount widening 12-3-2024. Comments received.

Public involvement Meeting for the FSP infill I project 1-18-2024; comments received.

Joint Agreement for the intersection improvement to Ashland and Old Collinsville Road in for review.

Skid reimbursement received from clean sweep.

Mr. Mosley made a motion seconded by Mr. O'Donnell to approve. All members present voted aye.

The Asst. Chairperson asked if there was any Old Business: None presented.

The Asst. Chairperson asked if there was any New Business: None presented.

ACTION ITEM

Mr. Mosley made a motion seconded by Mr. Allen to go into Executive Session to discuss personnel. All members present voted aye.

Following return to regular session Mr. Allen made a motion seconded by Mr. Hollingsworth to approve what was discussed in Executive Session.

All members present voted aye.

Adjournment

Mr. Mosley made a motion seconded by Mr. Allen to adjourn. All members present voted aye.

The Asst. Chairperson adjourned the meeting at 4:30 p.m.

BMP Training

Erosion & Sediment Control

Why Control Erosion and Sedimentation?

Sedimentation from erosion causes the following impacts:

1) Physical Impacts

- Damages aquatic areas and property
- Increases flooding effects
- Strains public infrastructure
- Increases maintenance costs

2) Biological Impacts

- Hinders plant growth
- Kills organisms and fish
- Disrupts the food chain

Controlling Erosion and Sedimentation

Best Management Practices

Stabilize Exits:

- Fabric Lined
- Clean 2-3" Stone
- Sweeping is in conjunction with, not instead of, stabilized access
- Can use rumble grates

Controlling Erosion and Sedimentation

Best Management Practices

Perimeter Controls

- Adequate for drainage area and site conditions
- Shouldn't be the only BMP
- Properly Installed and Maintained

Controlling Erosion and Sedimentation

Best Management Practices

Outfalls & Stormwater Ponds

- Check for discharges off site or the MS4
- Turbidity, erosion, stabilization

Controlling Erosion and Sedimentation

Post Construction Management

Stormwater Best Management Practice

General Construction Site Waste Management

Minimum Measure: Construction Site Stormwater Runoff Control
Subcategory: Good Housekeeping/Materials Management

Description

Construction staff manage and dispose of building materials and other construction site wastes to reduce the risk of pollution to stormwater. Practices such as trash disposal, recycling, proper material handling, and spill prevention and cleanup measures can reduce the potential for stormwater flow to mobilize construction site wastes and contaminate surface or ground water.

Applicability

Proper management and disposal of wastes will reduce pollution in stormwater discharge from any construction site. Good waste management practices include properly locating refuse piles, covering materials that stormwater discharges might displace, and preventing spills and leaks from hazardous materials.

Siting and Design Considerations

Waste management practices vary depending on the type of waste being managed, whether it is hazardous, and whether it might contaminate stormwater. Below are examples of management practices for different categories of construction site waste.

General Solid Wastes:

- Designate a waste collection area on-site that does not receive a substantial amount of stormwater flow from upland areas and does not drain directly to a waterbody.
- Ensure that containers have lids to cover them when it rains, or keep containers in a covered area whenever possible.
- Schedule waste collection to prevent the containers from overfilling.
- Clean up spills immediately. Use an absorbent material such as sawdust or cat litter to contain the spill.
- During the demolition phase of construction, provide extra containers and schedule more frequent pickups.
- Collect, remove and dispose of all construction site wastes at authorized disposal areas. Contact a local environmental agency to identify these disposal sites.

Construction waste should be collected in designated waste collection areas on-site, such as metal dumpsters.

Hazardous Materials and Wastes:

- For spills of hazardous materials, follow cleanup instructions on the package or, if applicable, the Safety Data Sheet.
- Consult with local waste management authorities about the requirements for disposing of hazardous materials.
- Never remove the original product label from the container—it contains important safety information. Follow the manufacturer's recommended method of disposal, which should appear on the label.
- Never mix excess products when disposing of them, unless the manufacturer specifically recommends doing so.
- For soils containing hazardous substances, consult with state or local solid waste regulatory agencies or private firms to ensure proper disposal. Some landfills might accept contaminated soils, but they require laboratory tests first.
- Construction staff often use sandblasting to remove paint and dirt from surfaces. This produces sandblasting grits—sand and paint and dirt particles. Sandblasting grits from older structures are hazardous, because they are more likely to contain lead-, cadmium- or chrome-based paints. To ensure

proper disposal of sandblasting grits, contract with a licensed waste management or transport and disposal firm.

Pesticides and Fertilizers:

- Follow all federal, state and local regulations that apply to the use, handling or disposal of pesticides and fertilizers.
- Do not handle the materials any more than necessary.
- Store pesticides and fertilizers in a dry, covered area.
- Construct berms or dikes to contain stored pesticides and fertilizers in case of spillage.
- Follow the application rates and methods specified on the product label.
- Have equipment and absorbent materials available in storage and application areas to contain and clean up any spills.

Petroleum Products:

- Store new and used petroleum products for vehicles in covered areas with berms or dikes in place to contain any spills.
- Immediately contain and clean up any spills with absorbent materials.
- Have equipment available in fuel storage areas and in vehicles to contain and clean up any spills.

Detergents:

- Detergents that contain phosphorus and nitrogen are common in wash water for cleaning vehicles. Excesses of these nutrients can be a major source of water pollution. Use detergents only as recommended and limit their use on the site. Do not dump wash water containing detergents into the storm drain system; direct it to a sanitary sewer or

capture and contain it for transport to a wastewater treatment plant for proper treatment.

Limitations

An effective waste management system requires training and signage to promote awareness of the hazards of improper storage, handling and disposal of wastes. Site superintendents should be aware of worker habits and inspect storage areas regularly. They may need to spend extra management time to ensure that all workers are following the proper procedures.

Maintenance Considerations

Construction staff should inspect storage and use areas and identify containers or equipment that could malfunction and cause leaks or spills. In addition, it is important for staff to check equipment and containers for leaks, corrosion, support or foundation failure, or other signs of deterioration, and test them for soundness. Construction staff should immediately repair or replace any defective containers.

Effectiveness

Waste management practices are effective only when all construction staff follow them consistently. In storage and use areas, site superintendents should post the guidelines for proper handling, storage and disposal of construction site wastes. In addition, site superintendents should ensure that workers receive training in these practices to ensure that everyone is knowledgeable enough to participate.

Cost Considerations

The costs associated with construction site waste management include purchasing and posting signs, increased management time for oversight, additional labor needed for special handling of wastes, transportation costs for waste hauling, and fees charged by disposal facilities to take the wastes.

Additional Information

Additional information on related practices and the Phase II MS4 program can be found at EPA's [National Menu of Best Management Practices \(BMPs\) for Stormwater](#) website

Disclaimer

This fact sheet is intended to be used for informational purposes only. These examples and references are not intended to be comprehensive and do not preclude the use of other technically sound practices. State or local requirements may apply.

Post-Construction Runoff Control Minimum Control Measure

Photo Credit: Image reproduced with permission from Montgomery County, MD Department of Environmental Protection

This fact sheet profiles the Post-Construction Runoff Control minimum control measure, one of six measures that the operator of a Phase II regulated small municipal separate storm sewer system (MS4) is required to include in its stormwater management program in order to meet the conditions of its National Pollutant Discharge Elimination System (NPDES) permit. This fact sheet offers some general considerations on strategies used by MS4s to implement post-construction runoff control programs. It is important to keep in mind that the small MS4 operator has flexibility in choosing exactly how to satisfy the requirements in its NPDES permit.

Post-Construction Runoff Control Minimum Control Measure

Why Is the Control of Post-Construction Runoff Important?

Post-construction stormwater management in areas undergoing new development or redevelopment helps control pollutants in runoff from these areas, which has been shown to significantly affect receiving waterbodies. Prior planning and design will minimize pollutants in post-construction stormwater discharges in the most cost-effective manner for stormwater quality management.

There are generally two forms of substantial impacts from post-construction runoff. The first is caused by an increase in the type and quantity of pollutants in stormwater runoff. As runoff flows over areas altered by development, it picks up harmful sediment and chemicals such as oil and grease, pesticides, heavy metals, and nutrients (e.g., nitrogen and phosphorus). These pollutants often become suspended in runoff and are carried to receiving waters, such as lakes, ponds, and streams. These pollutants can impact aquatic species in a variety of ways, including by being absorbed through fish tissue. The second kind of post-construction runoff impact occurs as a result of increasing the quantity of water delivered to the waterbody during storms. Increased impervious surfaces (e.g., parking lots, driveways, rooftops) interrupt the natural cycle of gradual percolation of water through vegetation and soil. Instead, water is collected from surfaces such as asphalt and concrete and routed to drainage systems where large volumes of runoff quickly flow to the nearest receiving water. The effects of this process include streambank scouring and downstream flooding, which often lead to a loss of aquatic life and damage to property.

What Is Required?

The Phase II regulations specify that permits require small MS4s to develop, implement, and enforce a program to address stormwater runoff from new development and redevelopment projects that result in the land disturbance of greater than or equal to 1 acre, or of less than one acre but that is part of a larger common plan of development or sale. NPDES permits will also require, at a minimum, that the small MS4 operator be required to:

- Develop and implement strategies which include a combination of structural and/or non-structural best management practices (BMPs).
- Use an ordinance or other regulatory mechanism to address post-construction runoff from new development and redevelopment projects to the extent allowable under state, tribal, or local law.
- Ensure adequate long-term operation and maintenance of controls.

What Is Considered a “Redevelopment” Project?

The post-construction runoff requirement in the Phase II Final Rule applies to “redevelopment” projects that alter the “footprint” of an existing site or building in such a way that there is a disturbance of equal to or greater than 1 acre of land (or less than one acre but part of a larger

Post-Construction Runoff Control Minimum Control Measure

common plan of development or sale). Redevelopment projects do not include such activities as exterior remodeling.

Because redevelopment projects may have site constraints not found on new development sites, the Phase II regulations provide flexibility for implementing post-construction controls on redevelopment sites that consider these constraints.

Post-Construction Permit Requirements

Each permit specifies the minimum elements that must be included in each post-construction runoff control program. These elements will differ from state to state although all permits will share the bottom-line requirement that the MS4 must implement a post-construction runoff control program that is tailored to the specific stormwater pollution control problems facing the community.

EPA has compiled several examples from federal and state MS4 permits that address the post-construction runoff minimum control measure. These examples are included in a series of permit compendia available on the EPA's stormwater website. See particularly Section E (Post-Construction Runoff) in the EPA's [*Compendium of MS4 Permitting Approaches – Part 1: Six Minimum Control Measures*](#).

Post-Construction BMPs

This section includes some non-structural and structural BMPs that could be used to satisfy post-construction requirements in small MS4 permits. It is important to recognize that many BMPs are climate-specific, and not all BMPs are appropriate in every geographic area. Because the requirements of this measure are closely tied to the requirements of the construction site runoff control minimum measure (see Fact Sheet 2.6), EPA recommends that small MS4 operators develop and implement these two measures in tandem.

- **Planning Procedures.** Runoff problems can be addressed efficiently with sound planning procedures. Local master plans, comprehensive plans, and zoning ordinances can promote improved water quality in many ways, such as guiding the growth of a community away from sensitive areas to areas that can support it without compromising water quality.
- **Site-Planning Based BMPs.** These may include buffer and riparian zone preservation, site restrictions on the amount of disturbance and imperviousness, and maximization of open space.
- **Stormwater Harvesting BMPs.** These practices may include rain barrels and cisterns that collect and temporarily store stormwater from rooftops for later release and/or use.
- **Stormwater Retention/Detention BMPs.** Retention or detention BMPs control stormwater by gathering runoff in wet ponds, dry basins, or multichamber catch basins and slowly releasing it to receiving waters or drainage systems. These practices can be

Post-Construction Runoff Control Minimum Control Measure

designed to both control stormwater volume and settle out particulates for pollutant removal.

- **Infiltration BMPs.** Infiltration BMPs are designed to facilitate the percolation of runoff through the soil to ground water, and, thereby, result in reduced stormwater runoff quantity and reduced mobilization of pollutants. Examples include infiltration basins/trenches, dry wells, and porous pavement.
- **Vegetative BMPs.** Vegetative BMPs are landscaping features that, with optimal design and good soil conditions, remove pollutants, and facilitate percolation of runoff, thereby maintaining natural site hydrology, promoting healthier habitats, and increasing aesthetic appeal. Examples include bioswales, filter strips, artificial wetlands, and rain gardens.

Visit us at: co.st-clair.il.us/stormwater

Or
Call us at 618-825-2531

WHAT ARE BEST MANAGEMENT PRACTICES?

Stormwater best management practices (BMPs) are techniques, measures or structural controls used to manage the quantity and improve the quality of stormwater runoff. The goal of BMPs is to mimic the natural way water moved through an area before development by using design techniques to infiltrate, evaporate, and reuse runoff close to its source. BMPs help reduce the amount of and improve the quality of stormwater runoff. Please preserve our streams by utilizing these BMPs.

QUICK FIXES

Rain barrels are an easy and inexpensive way to capture and store runoff falling from gutters. The stored water can later be used to water gardens and lawns. You can make your own barrels or purchase them locally with simple installation. Another easy fix is adding a rain garden to your property. This attractive BMP is effective in reducing the amount of runoff leaving your property. Rain gardens utilize native plants with deep roots to absorb runoff, filter pollutants and promote groundwater recharge. Even simple changes in habit can be a BMP. For example, using phosphate-free products when washing your car or fertilizing your lawn go a long way in reducing pollutants in stormwater runoff. Something as small as cleaning up after your pet and ensuring litter is properly disposed of can also help.

CONSTRUCTION SOLUTIONS

Some BMPs require more involvement, but should be considered when building or renovating homes. For example, green roofs are an excellent way to decrease the amount of runoff leaving your property. Green roofs not only utilize water where it falls, but help prevent urban heat islands. Green roofs are a more expensive upgrade to your property, but they save money on heating and cooling costs. They can also be constructed on flat and sloped surfaces. A permeable paver is another BMP used as an alternative to traditional concrete or asphalt paving. The pavers decrease runoff by allowing water to seep into cracks that are filled with an aggregate. Remember, anything you can do to reduce pollutants in St. Clair County streams helps everyone!

REMEMBER...

- Use permeable pavers instead of asphalt or concrete.
- Plant rain gardens using native species.
- Mix composts into lawns and gardens to use for fertilizer.
- Install rain barrels and use it to water your plants and lawn.
- Don't use your hose as a broom.
- Build green vegetated roofs.
- Keep your vehicle regularly maintained and free of leakage.
- Use phosphate-free products outdoors.
- Put litter in its place.
- Use alternative deicing methods on your driveway in the winter.
- Clean up animal waste.
- Properly dispose of grass clippings and leaves.
- Wash your car on the lawn.
- Report illicit discharge into sewers and streams.

ST. CLAIR COUNTY

co.st-clair.il.us/stormwater

Best Management Practices for Good Housekeeping

Follow these BMPs to control pollutant discharges. The objectives are: 1) to keep pollutants from contacting rain, and 2) to keep pollutants from being dumped or poured into the storm drains. The goal is "only rain in the storm drain."

Activities

Best Management Practices

- | | |
|----------------------------|---|
| Pavement Cleaning | <ul style="list-style-type: none"> • Sweep parking lots and other paved areas periodically to remove debris. Dispose of debris in the garbage. • If outdoor pavement cleaning with detergent is required, collect wash water and dispose in indoor sinks or drains for discharge to the sanitary sewer. Contact your local wastewater treatment agency. |
| Litter Control | <ul style="list-style-type: none"> • Provide an adequate number of trash receptacles for your customers and employees. This helps keep trash from overflowing the receptacles. • Pick up litter and other wastes daily from outside areas including storm drain inlet grates. |
| Waste Disposal | <ul style="list-style-type: none"> • Inspect dumpsters and other waste containers periodically. Repair or replace leaky dumpsters and containers. • Cover dumpsters and other waste containers. • Never dispose of waste products in storm drain inlets. • Recycle wastes or dispose properly. |
| Materials Storage | <ul style="list-style-type: none"> • Store materials such as grease, paints, detergents, metals, and raw materials in appropriate, labeled containers. • Make sure all outdoor storage containers have lids, and that the lids are adequately closed. • Store stockpiled materials inside a building, under a roof, or covered with a tarp to prevent contact with rain. |
| Training | <ul style="list-style-type: none"> • Train employees regularly on good housekeeping practices. • Assign a person to be responsible for effective implementation of BMPs. |
| Equipment/Vehicle Cleaning | <ul style="list-style-type: none"> • Maintain equipment and vehicles regularly. Check for and fix leaks. • Use drip pans to collect leaks or spills during maintenance activities. • Wash equipment/vehicles in a designated and/or covered area where the wash water is collected to be recycled or discharged to the sanitary sewer. Contact your local wastewater treatment agency. |

Some Facilities will require structural control BMPs if simpler operation ones are not adequate for keeping pollutant discharges from the storm drains.

* Hazardous materials must comply with hazardous materials storage and disposal requirements.

Morning Speaker: Friday 8:15 a.m.

 National Association of County Engineers Update, Executive Director Kevan Stone

7 Total Professional Development Hours

Thank you for attending the 2024 IACE Fall Conference.

Conrad Moore

Woodford County Engineer
Conference Planning Chair

Kiefer Heiman

Washington County Engineer
Conference Planning Chair

CERTIFICATE

This certificate declares that

Norman Etling

has completed

**September 2024 First Friday - Bioswales,
Bio-Infiltration, Basins, and Basin Retrofits –The 3
Bs of Natural Based Solutions**

on 9/6/2024

With passing score of 100%

Certificate ID MJCNU-CE000084

CERTIFICATE

This certificate declares that

Wayne Sandheinrich

has completed

**September 2024 First Friday – Bioswales,
Bio-Infiltration, Basins, and Basin Retrofits –The 3
Bs of Natural Based Solutions**

on 9/6/2024

With passing score of 100%

Certificate ID MJCNU-CE000072

Illinois Department of Transportation

Awards this certificate of training to

Etling, Norm

In recognition of successful completion of

TT - Permitting in the Floodplain

PDH Hours: 1.00

Date: 11/06/2024 Serial No: 5220628

Quarterly Visual Inspection

Field Sheets

Outfall Dry Weather Screening

Field Sheets

Village of Shiloh

Storm Water Sampling Locations

Year 2017

Sampling Site #1

Behind Freddy's Frozen
Custard – at #3320 Green Mt
Crossing Drive

Sampling Site #2

Bridge on Frank Scott Pkwy
East – 750 feet west of
Fountain Lakes Entrance

Sampling Site #3

Behind residence at #21
Prairie View Rd – 280 feet
west from behind home

Notes:

At Sampling Sites #1 & #2 the drainage flows **into** the Village from the north.
At Sampling Site #3 the drainage flows **out** of the Village to the southwest.

Quarterly Visual Inspection - Field Sheet

St. Clair County MS4 Co-permittee Group

This form is for your own use and should be kept as part of your MS4 documentation. It **does not** have to be submitted to the IEPA unless requested. Use one form per outfall.

This inspection should be performed when sufficient runoff occurs during daylight hours. Try to make observations within the first 30 minutes after runoff begins discharging from the outfall, or as soon as practical. At a minimum test should be taken within 48-hours of a rainfall event greater than or equal to 0.25" in a 24-hour period. If you find visible pollution, note the probable source and list any possible Best Management Practices that could be used to reduce or eliminate the problem.

This form is for your own use and should be kept as part of your MS4 documentation. It **does not** have to be submitted to the IEPA unless requested. Use one form per outfall.

This inspection should be performed when sufficient runoff occurs during daylight hours. Try to make observations within the first 30 minutes after runoff begins discharging from the outfall, or as soon as practical. At a minimum test should be taken within 48-hours of a rainfall event greater than or equal to 0.25" in a 24-hour period. If you find visible pollution, note the probable source and list any possible Best Management Practices that could be used to reduce or eliminate the problem.

Outfall Number (make reference to site map)

1

Description of Outfall (e.g., ditch, concrete pipe, grassed swale, etc.)

Box Culvert

Time of Rainfall Event

04/02/2024

Time of Visual Inspection

8:40 am

Optional: Amount of Rainfall at the Time of Observation (nearest tenth of an inch)

1.80"

Describe your observations. An easy way to conduct this inspection is to use a glass jar to collect a sample of the storm water being discharged from the facility and visually inspect the water. Include any observations of color, odor, turbidity, floating solids, foam, oil sheen or any other visual indicators of storm water pollution and the probable sources of any observed storm water contamination.

Color: ☒ Clear ☐ Red ☐ Yellow ☐ Brown ☐ Other:

Odor: ☒ None ☐ Musty ☐ Sewage ☐ Rotten Egg ☐ Other:

Clarity: ☐ Clear ☒ Cloudy ☐ Opaque ☐ Suspended Solids ☐ Other:

Floatable: ☒ None ☐ Foam ☐ Garbage ☐ Oily Film ☐ Other:

Deposits / Stains: ☒ None ☐ Oily ☐ Sludge ☐ Sediments ☐ Other:

Vegetation: ☒ Normal ☐ Excessive ☐ Inhibited Growth Extent:

Identify Structure:

Damage to Outfall Structure:

☒ None ☐ Concrete Cracking ☐ Concrete Spalling ☐ Other:

☐ Peeling Paint ☐ Corrosion Extent:

Comments:

This outfall could not be evaluated during this quarter due to the following reason:

Quarterly Visual Inspection - Field Sheet

St. Clair County MS4 Co-permittee Group
